

SeedResQ

17 – 28 October 2016

Seed Captain Course on SeedResQ hosted by
International Seed Academy (ISA)

**What is the biggest
and unavoidable cost
for seed companies?**

**Personnel?
R&D?
Travel?
Legal?**

NO!

It is ...

**INVENTORY
WRITE-OFF!!!**

Seed companies destroy between 30% and 60% of their inventory each year, just because the seed is obsolete or more often, unsuitable for sales!

Seed is a living organism. It breathes, it catches diseases, it ages, it dies....

How can we keep it alive and in good shape as long as possible?

How can we identify seed that will deteriorate faster?
And why?

How can we minimize further deterioration and slow down the aging?

How can we save the good seeds out of a bad lot?

This is what we propose to review and answer with you during our SeedResQ course. You will attend demonstrations and participate hands-on, in some of the proposed methods. This will take place in Bangkok, Thailand over 2 weeks during 17-28 October 2016.

Registration

Including the course document, hotel and meals.... The registration fee is US\$5,200, early registration is advised since the number of participants is limited to a maximum of 16 and first-come first-served basis will be apply.

Contact

Please send your registration to info@seedacademy.org or by fax + 66 2 531 2570
